Each week I want to feature one
of our Island businesses.
This weeks feature is:

D & S HEATING COOLING & REFRIGERATION

D & S Heating, Cooling & Refrigeration was first incorporated over thirty years ago by Doug & Nancy Shugar, along with their son Chris. Since Doug was still working full time at Ford Engineering in Dearborn at the time, Chris ran the business. 1997 was a huge year of transitions. Chris passed away, Doug retired from Ford, and Doug & Nancy changed their full time residency from St. Clair Shores to Harsens Island.

While duck hunting was a big draw to the island, they also value the island community and Doug is an active member of the H.I. Lions.

I know the professional work they have done for us, both on the island and in St. Clair, but I asked Nancy to list for me the wide variety of services they provide:

D & S works on all MARINE VESSEL's: repairing A/C, refrigeration, generators and water heaters. They also work on RV's and Trailers. They sell high efficiency equipment that qualifies for a tax rebate.

No job is too small or too big! They work on everything from gas lines & fireplaces to gas logs and duct work. They install whole house ventilation systems and work on window A/C units.

They service all gas & electric appliances, including refrigerators, freezers (both residential & commercial), pool heaters and geo-thermal systems.

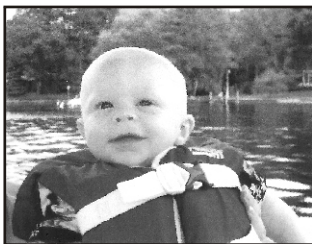

D & S is fully licensed and insured. Doug holds an unlimited mechanical license and has worked all over the state. They like to hire island residents and appreciate their hard work. Good people, good work, good to know!

Practical Phragmites Control Workshop

Saturday, August 1, 2009 at 1 PM

Stewart Farm, 2007 Stewart Rd., Harsens Island, MI

Phragmites is the common reed plant which has taken over many of our natural areas. It out competes the native plants and creates a monoculture of reeds. It reduces the biodiversity of plants and therefore the biodiversity of animal life. It limits views, limits access to lakes, rivers and canals for recreational purposes, reduces property values and is a fire hazard. This presentation will concentrate on the practical aspects of small scale Phragmites control. The control recommendations are based on MDEQ and DNR research and publications. A presentation will be followed by a demonstration of the preparation and treatment process. Attendees are welcome to visit the Stewart Farm Lakeplain Prairie following the workshop.

There is no charge for this event though donations to The Stewardship Network are welcomed.

FISHING Q & A on possession limits

(excerpt from *Outdoor Observations*, Bill Parker, Editor)

Q) Am I in violation if I have more than 10 fish in the freezer?

A) NO, according to Lt. Turner of the DNR Law Enforcement Division. This limit is really geared toward people in the field (like at a campsite) not in your freezer at home.

Q) If I give fish to friends/neighbors, and the DNR checks them and they don't have a fishing license, are they in violation?

A) NO, as long as they weren't involved in the act of fishing.

On your part, it matters that you gave away the fish (Selling your catch is illegal)

Can Anyone Identify the Ship???

On the night of Monday, June 22 - or the early morning of Tuesday, June 23 - an upbound ship created a wake that took down 32 feet of my dock. The Coast Guard has been able to identify 7 ships that passed during that time, but we have not been able to narrow it down to THE ONE ship that caused the damage. If you know anything about the identity of the ship that created this little tsunami, please contact me at #248-255-7430 or 248-652-4796. I have no recourse for holding a ship liable for damages until I know which ship was the offender. Please contact

The Harsens Island Transportation Authority (HITA)

which was formed in 1997 to seek alternative means of transportation to the island, has cancelled its semi-annual July mtg. John Fannon recently spoke with representatives from the International Bridge Company and they stated "We fully intend to put the bridge in, however, due to current economic conditions, the bridge to Harsens Island is on hold." There "may be" a meeting on the 3rd Tuesday in January (2010) if there are any new developments to report.
